

Environmental Conservation

**RFNS SENIOR SCIENCE
COLLEGE AKKALKUWA**

7.1.2: The Institution has facilities and initiatives for

1. Alternate sources of energy and energy conservation measures
2. Management of the various types of degradable and no degradable waste
3. Water conservation
4. Green campus initiatives
5. Disabled-friendly, barrier free environment

1. Alternate sources of energy and energy conservation measures:

The Institution uses LED Tubes to save energy. LED tubes have been installed in all classrooms. The instructions to switch off the lights, computers, printers and equipment's are displayed where ever necessary.

The use of LED Bulb in Classrooms

The use of LED Bulb in Seminar Hall

Instructions are displayed to Save Energy in Office

Instructions are displayed to Save Energy in Classroom

2. Management of the various types of degradable and no degradable waste

Solid waste includes garbage, rubbish such as paper in classrooms, Laboratory and offices. Dustbins are located at different places to collect solid wastes .Sorapada Group Gram Panchayat collects garbage of the campus and takes it away regularly. The NSS units of the college organize cleanliness programs in college premises. The NSS volunteers regularly participate in campus cleaning initiatives. Teaching and non-teaching staff of the concerned department's instruct the students for optimum care to be taken while using hazardous solid chemicals in the practical

3. Water conservation

The major sources of wastewater generation in College are wash basins, toilets and science laboratories. The wastewater from science laboratories is disposed properly. Liquid wastes generated in the science laboratories are diluted with water & then discharged. The college has designed the outflow of the liquid waste in such a way that it prevents contamination of wastewater on the campus. A properly constructed leakage proof sewage system is used for drainage

Drainage System for Waste Water

Drainage System for Waste Water

Safety Tank for Waste

Drainage Chamber for Waste Water

Absorption Pit for Water Conservation

Reuse of Wastage Water for Plant

Rain Water Harvesting

As a measure of water conservation, a proper rain water harvesting system has been installed in the main building of the college to channelize the water collected during rainy season. The Department of Chemistry has met with its need of distilled water by storing the rainwater in a tank. The rain water falling on the roof-top is smoothly carried to the tank, where it is stored for being used in practical. The remaining rainwater is harvested in the percolation tank.

Rain Water Harvesting System for Water Conservation

Rain Water Harvesting System for Water Conservation

Rain Water Harvesting System for Water Conservation

Ground Water Recharge Trough Open Space

4. Green campus initiatives

Restricted entry of Automobiles:. All entry points into the campus were closed for vehicles and those who come by vehicles had to park them outside the campus and walk to their department or office. Most of the students of our College come from nearby villages; they use public state transport for daily commute to the college. Bus stand is just half kilometer away from the campus hence students prefer to walk.

**Celebrate World Bicycle Day for Promotion for Bicycle use for Environment Conservation
on 03/06/2022 Organize by NSS**

Use of Public State Transport by students: The majority of our students use public transport to commute to college.

Student Bus Ticket and Pass- Student Use Public Transport

Ban on plastic:- - Students are appealed not to use plastic materials to maintain plastic free campus. In this regard instructions are given to students in the class rooms as well as notice boards. The premises are also kept clean through cleanliness campaigns with the help of NSS Volunteers. Students are instructed to use garbage cans for disposal of water, pouches, plastic bags, which helps in maintaining cleanliness on the campus. Dustbins have been kept in each class room, library, office, and staff room. All this garbage is collected with the help of non-teaching staff and transferred to the garbage truck of the Gram Panchayat for disposal.

Summery:-

The institution prioritizes energy conservation and environmental management. LED tubes are installed in all classrooms to reduce energy use, and clear instructions for turning off lights and equipment are provided. Solid waste, including paper, is collected in dustbins throughout the campus, and garbage is regularly removed by the Sorapada Group Gram Panchayat. NSS units organize and participate in campus cleaning initiatives, and staff educate students on safely handling hazardous chemicals. Wastewater is managed through a well-designed sewage system that prevents contamination. Science lab liquid wastes are diluted and safely discharged. Vehicle access is restricted, with parking outside the campus to encourage walking, especially for students who use nearby public transport. The campus is designed to be disabled-friendly and barrier-free.
